

Utility, Grocery, Food Supply, and Public Employee Workers,

As you have probably already heard, El Dorado County has been chosen by the State to have two COVID-19 testing sites. We have located one site for the South Lake Tahoe area and the other for the west slope of the county. The two sites will be open to the public, appointment only, without restrictions to test for COVID-19. These two test sites are planned to be open for approximately two months and can be extended if needed..

We want to give you the opportunity for testing before we open it up to the general public in the County. We have opened up the COVID-19 Testing Registration for this group starting on May 2nd at 1 pm. On May 3rd, registration will be advertised to the general public for appointments. Please notify your staff and employees of this opportunity.

Testing will be paid for by your personal medical insurance provider unless you do not have insurance coverage. For those who do not have medical coverage, the State will cover the cost of the test. Please have your identification card available at the site for registration purposes. It does not matter if the individual is documented or undocumented to get the test. If they do not have an identification card, the staff will generate a unique identifier number to get results.

Test results are expected to take 48-72 hours. All test results will be entered into the California Reportable Disease Information Exchange (CalREDIE) site. Patients will receive a card at the time of testing to go to LHI.CARE for test results and they will be contacted by telephone if the patient's test comes back positive. The nurse will contact positive test result patients.

Process is APPOINTMENT ONLY

Registration opens on May 2nd at 1 pm hours.
